

MANNESMANN DMV STAINLESS

QUALITY IN ROUND TERMS.

Reliability. Powered by experience

Throughout the development of the European nuclear industry, it has been supported and supplied by Mannesmann DMV Stainless.

Long-time experience also led our tubing and piping into other overseas nuclear programs. New generation Nuclear Power Plants will also count on DMV.

DMV quality assurance systems meet the requirements of ISO 9001, RCCM and ASME.

Supply. Whatever you require

Within our general seamless tubular product range of 6-250mm OD (0.24-9.84 inches) and 0,5- 50mm WT (0.02-1.97 inches), supply to the nuclear industry comprises mainly austenitic and nickel alloy grades.

Our products for nuclear applications include:

- Piping and Tubing
- Heat Exchanger Tubes
- Hollow Bars for mechanical applications
- Instrumentation Tubes

Grades. According to your needs

DMV 304 L DMV 600
DMV 316 L DMV 800
DMV 400

DMV can supply these grades, and others, in standard qualities or with modified chemical composition.
